

ROOF MAINTENANCE AND CARE GUIDE

**PERMA-TECH
ROOFING SUPPLY**
THE SCIENCE OF STRONG ROOFS

Follow this simple maintenance program to ensure optimal performance and longevity.

Maintain Records

Keep records of receipts, product details, agreements and maintenance history.

Annual Inspection

Inspect your roof and coating at least once a year.

Focus on high-traffic areas, transitions, penetrations, and flashings.

Keep the roof surface clean and debris-free.

Post-Weather Check

After extreme weather, check for potential damage to your roof.

Timely Repairs

Promptly address damages not covered by the standard Material Warranty.

Use TRC-approved products and applicators.

Thorough Examination

Regularly inspect roof penetrations, flashings, skylights, and substrate.

Ensure water tightness and perform necessary repairs.

Foot Traffic Management

Designate walk paths to minimize foot traffic damage.

Regularly inspect paths and make repairs when needed.

Thank you for choosing Tucson Rubberized Coatings to safeguard and extend the lifespan of your roof system. Here are the benefits to choosing us:

- ✓ Premium Protection: Our coatings ensure the longevity of your roof.
- ✓ Durability: Proper maintenance guarantees lasting performance.
- ✓ Warranty Support: Adhere to guidelines to maintain Material Warranty validity.
